

BROADCASTING OF LOCAL COMMUNITIES

Local radio broadcasting, above all, is the broadcasting of local communities. It satisfies the needs of the population in accessing local information content and provides prompt information on emergencies.

OZON S TECHNICAL SUPPORT FOR THE ORGANIZATION OF LOCAL COMMUNITIES` BROADCASTING

ALARTING BLOCK 50-FM-06 WITH BUILT-IN LOW-POWER RADIO TRANSMITTER

It provides the broadcast of the content of the local studio, as well as the contents of the radio broadcasters. By command from an automated workplace (AW) of a local (LASCA) or a territorial automated system of central alerting (TASCA) switches to the broadcast of emergency messages.

SIGNAL-LOUD SPEAKING DEVICES WITH AUTONOMOUS POWER SUPPLY

Places with a massive presence of people should be provided with signal-loud speaking devices. Having received a command for alerting about an emergency, they are turned on at full power at any time.

SPECIALIZED AIR RADIO BROADCASTING RECEIVER

It provides in-doors alerting with the broadcast of informational speech messages through the loudspeaker. Having received the command, it will be activated to full volume regardless of the user's setting. It has an indication of missed messages.

LOCAL COMMUNITIES

POSSIBILITIES OF THE SYSTEM

Broadcasting of communities encourages the development of civil society: initiates public discussions on local issues, increases the competence of the public on issues of local self-government, promotes the process of decentralization, and effectively protects the rights and freedoms of citizens, promotes state information security.

In addition to controlling the signal - loudspeaker devices, the broadcasting system can be used to provide a variety of entertaining information for the public, in particular: news, reports on local government activities, commercial advertisements, greetings, announcements of important local events, as well as the popularization of national ideas.
